

Episode construction and availability

UKHLS		HRS	
Collapsed candidate episodes	62,605	Collapsed candidate episodes	61,970
Contains a primary event	44,949	Contains a primary event	19,677
Isolated primary event	43,249	Isolated primary event	18,976
Valid pre1 and event self-report	38,442	Valid pre1 and event self-report	16,938
Final trajectory sample	38,438	Final trajectory sample	16,938
Has additional pre2	30,384	Has additional pre2	13,370
Observed uncensored year2	22,845	Observed uncensored year2	12,125
Observed uncensored year4	12,957	Observed uncensored year4	9,140
Complete pre1 event year2 year4	11,870	Complete pre1 event year2 year4	7,973
Isolated primary audit	43,249	Isolated primary audit	18,976
Compound primary audit	1,700	Compound primary audit	701
primary with any secondary concurrent	3,077	primary with any secondary concurrent	5,846
year2 censored by later primary	8,713	year2 censored by later primary	3,677
year4 censored by later primary	13,265	year4 censored by later primary	5,877

Follow-up availability rows are overlapping subsets, not sequential exclusions. Compound episodes are retained once for sensitivity only. A later primary adversity censors follow-up at or after its transition date.
