

Response history within recurrent adversity domains

● CV: person-grouped cross-validation

○ T: temporal holdout

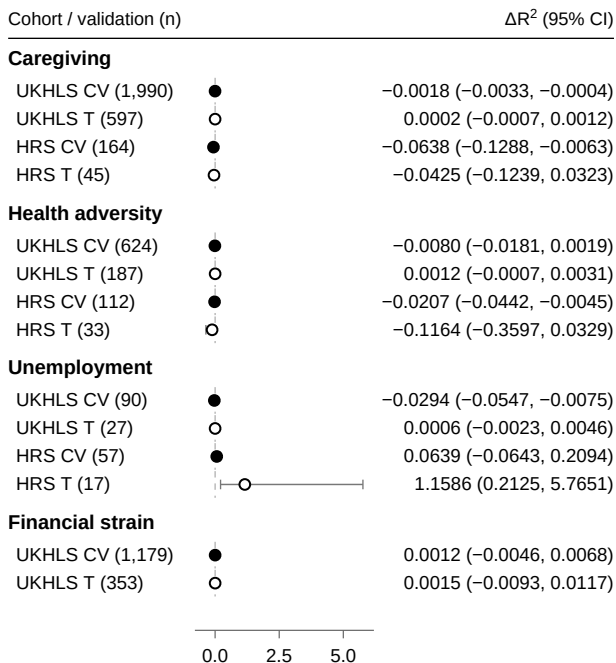

a Acute response

Without current mental health

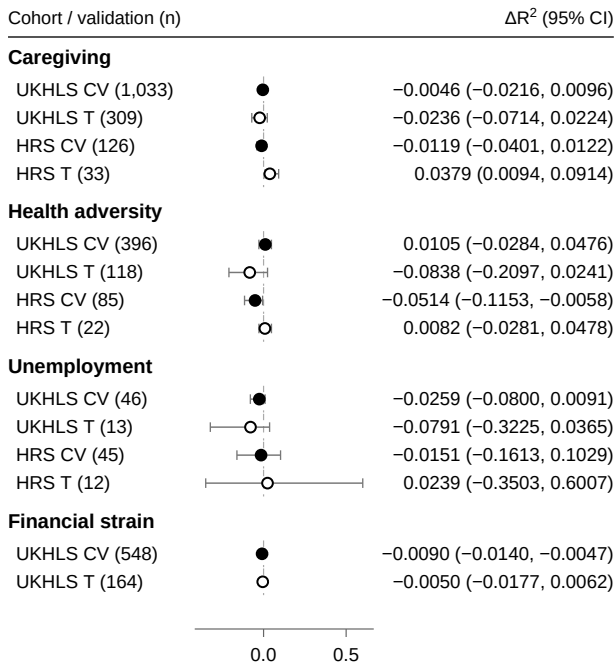

b Acute response

After current mental health

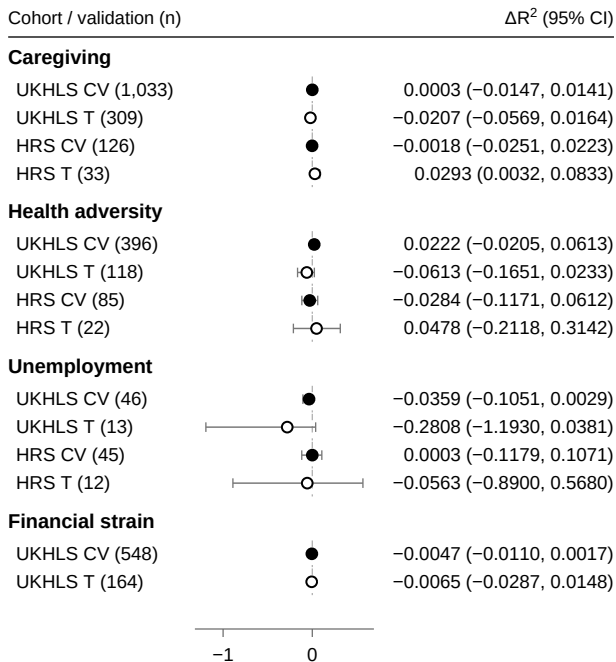

c Two-year persistence

Without current mental health

d Two-year persistence

After current mental health

UKHLS recurrent caregiving was primary; other domains and HRS analyses were secondary.

Axis ranges differ between panels. Error bars show person-cluster bootstrap 95% confidence intervals.
